

## The Information Industry and Infrastructure

The information industry is a fast-growing market that Hong Kong cannot afford to ignore. Our task is to facilitate the development of an information infrastructure that will facilitate the application of information technology in every aspect of our daily activities and the development of the information industry.

### To promote the information industry and infrastructure

#### Initiatives

We will re-organise the work of a number of bureaux and create a new supreme at head of bureau level to mastermind the development of information technology in Hong Kong.

#### Benefits

- ✓ Reorganisation of bureaux will be completed in early 1998 to provide stimulus to the integration of Hong Kong into the information world.
